

## REQUIREMENT

SN Corporation sells various types of products in various regions and countries. I want to calculate the total cost, sales, and profit of the products and also analyze graphs based on the following questions.

**Q1-** Find out total cost, sales, and profit of the products.

**Q2-** find out the total cost, sales, and profit of the products by sub-category.

**Q3-** Find the total quantity sold in each region.

**Q4-** Find the state, and country where the products were sold.

**Q5-** Find the total sales, cost, and profit by shipped mode.

**Q6-** find total sales, cost, and profit by category and segment
